

Custom software, AI systems, and Section 508 accessibility for government and commercial buyers. Delivered by a senior engineer with defense-program roots, not a junior bench.

CORE COMPETENCIES

- Custom web applications — .NET, React, TypeScript, PostgreSQL
- Form and workflow digitization — approval routing and audit trails
- Section 508 / WCAG 2.1 AA — audits, remediation, conformance documentation
- AI and agent development — LLM features, retrieval, evaluation, guardrails
- Legacy modernization — stabilization and incremental replacement
- Cloud and DevOps — Azure, AWS, containerized delivery, CI/CD

DIFFERENTIATORS

- Defense-program engineering roots. Founding engineer began on Raytheon naval and Northrop Grumman spacecraft simulation programs, where correctness was non-negotiable, followed by AWS-scale data planes and enterprise AI infrastructure.
- Senior delivery, small-business pricing. One accountable engineer end to end, with no layers between you and the work.
- Accessible by default. Every screen is built against WCAG 2.1 AA from the start, with conformance documentation included rather than retrofitted.
- Audit-ready foundations. Role-based access control, comprehensive audit logging, and structured logging ship in the standard framework, so security-review controls are already in place.
- Right-sized procurement. Fixed-price awards, purchase-card transactions, and subcontracts to prime contractors.

PAST PERFORMANCE

Simply Jade simply-jade.com Full-stack content platform: static generation for search performance, custom admin with authentication, role-based access and audit logging, feature-flagged rollouts, and automated deploy on publish. Maintained and extended since launch. .NET 8 · React 19 · TypeScript · PostgreSQL · CI/CD	Third Day Builders thirddaybuilders.com Pre-rendered marketing site with project gallery, structured metadata and local search optimization, an inquiry flow, and a private admin portal the owner runs without developer involvement. React 19 · TypeScript · React Router SSG · CI/CD
